# Agenda Item 2

## EXETER CITY COUNCIL

## J L THOMAS LIAISON GROUP

Wednesday 18 April 2012

#### Present:-

Councillor Percy Prowse (Chair) Councillor Vanessa Newcombe Mr N Parsons, J L Thomas Mr R Sargent, J L Thomas

John Leech, Environmental Health Manager (JL) Alex Bulleid, Environmental Health Technician (AB) Jo Quinnell, Assistant Member Services Officer

#### 63

## **APOLOGIES**

Apologies were received from Councillor Choules and John Staddon.

## 64 NOTES OF MEETING HELD ON 16 NOVEMBER 2011

The notes of the meeting held on 16 November 2011 were agreed as a correct record.

### Minute No. 61 – Any Other Business

It was noted that the Alphington Road closure had not caused any problems to the factory.

#### 65

## PROCESS UPDATE

Nick Parsons reported that the period between November 2011 and March 2012 had seen stable tonnages processed by the factory. The normal seasonal peak (November/December) saw tonnages average at between 1,500 and 1,600 tonnes per week. The remainder of the period saw average tonnages at around 1,400 tonnes per week. This level of production is anticipated to continue through the remainder of 2012 although it is expected to see a slight fall in receipts during the months of July and August.

There were no other significant process changes carried out during this period.

#### 66

### COMPLAINTS RECEIVED SINCE THE LAST MEETING

The summary of complaints was circulated.

It was noted that November was one of the busiest months at the factory. Alex advised that when investigating complaints, no processing problems were found at the factory, although there had been some odour present.

During February, problems had been identified with the effluent treatment plant, and odours were stronger than expected. The factory had been asked to consider how such an incident would be managed if it happened again in the future. The procedure will now be tightened up as a result.

It was noted that the number of complainants in each road had been identified in the report in a way to keep those persons details confidential.

As a comparison to last year's figures, Alex Bullied advised that they were fairly similar to last year.

When a complaint is received by the City Council, if possible, a site visit will be made. Complainants are usually contacted by telephone or visit to explain what is happening at the factory.

If a complaint is made direct to the factory, the company's complaints procedure is followed. The complainant will usually either speak to Nick Parsons or, if out of hours, the team leader. They were currently reviewing the procedure. The City Council are advised if a complaint has been made.

Councillor Newcombe commented on how well the complaints procedure was handled.

An article had been placed in St Leonards News in the Autumn to advise members of the public the process for dealing with complaints to the factory. This is distributed to approximately 2,500 houses, and did not seem to have generated any more complaints.

#### 67

#### ANY OTHER BUSINESS

#### **Trial Procedure**

Alex Bullied reported on a trial procedure relating to the operation of the boiler and stand-by incinerator. The most concentrated odours are incinerated by the boiler. The factory had made the request to reduce the firing rate in the boiler which will enable the factory to use the incinerator less often and in a more managed fashion. The trial would take place this summer, and if there were problems and it was found to be creating odours, the trial would stop.

During periods of breakdowns when the boiler stops, there will be more time to get the incinerator up to temperature to destroy vapours.

If the trial proved successful, it was hoped to agree this as a permanent change at the next meeting.

#### Scenting of vehicles

Councillor Newcombe requested details of scenting of vehicles.

Rob Sargent advised that rigid vehicles have a built-in industrial scent spray which is distributed over the top of the load. Drivers of articulated lorries stop outside of the city to spray their vehicles manually. The scent currently used is vanilla.

#### 68 DATE OF NEXT MEETING - WEDNESDAY 3 OCTOBER 2012 AT 2PM

The date of the next meeting was noted.

(The meeting commenced at 2.00 pm and closed at 2.23 pm)

#### JL Thomas & Co. Ltd, Canal Banks, Exeter Complaints since the last meeting

Case Comments	email received:
	'I live at River Meadows, Water Lane, unfortunately recently the odour from the nearby factory has increased greatly, with the strong smell making it unpleasant to open windows in the flat on summer days. Does this come under your jurisdiction?'
Case Comments	email sent in reply:
	Thank you for your email. Complaints about odour from the animal rendering factory (JL Thomas) do fall within our jurisdiction.
	If we receive a complaint we endeavour to investigate as soon as possible. This includes making an assessment of the odour at the complainant's property and visiting the factory to check whether they are complying with the requirements which we have placed upon them.
	It is therefore best if you can call us whenever you regard the odour to be unacceptable so that we can investigate thoroughly. Please call 01392 265148 during office hours or 0845 351 10 60 during the evenings/at weekends.
	If you have any further questions about this matter, please contact me on 01392 265474.
Case Comments	email received:
	'Thanks for the quick reply, the odour at the flat is somewhat variable depending on the weather/wind etc. You should be able to make a v straightforward assessment just by walking past, this may be a bit better as I tend not to be home til late on weekdays.'

E-Mail received	Your link doesn't work unfortunately:					
	http://eforms.exeter.gov.uk/Ef3/InitXML.action?form=Report_It&reporttype=envhealth					
	I was hoping log a complaint regarding the really unpleasant smell in the air coming from the rendering plant in Marsh					
	Barton. I live in Exeter (Marlborough Road) and also work in Marsh Barton, and during this week, in particular today (Saturday) the smell coming from the plant is really unpleasant, to the point of making you gag. It seems to getting regular now, and no effort being made to hid it. If they do run filters they don't work, or get by passed apart from when inspected.					
	This is a single business that effects the air quality of several thousands homes, a handful of schools and everyone else running business in Marsh Barton. Who gets affected is simply a lottery based on the direction of the wind.					
	Please can you do something about this, it's an awful smell and I do not see why we all have to put up with it given the promises of both ECC and even the MP to do something about it a few years back.					
E-Mail sent:	Thank you for your email. I'm sorry that the link did not work for you. We have tested it and it seems OK, so it may have been a temporary glitch with the website.					
	Thank you for letting us know that the odour from JL Thomas has been disturbing you recently. I know that they suffered a major plant breakdown on Friday which may have contributed to the odour which you experienced on Friday and Saturday.					
	In order to make a full investigation of any complaints, we endeavour to investigate as soon as possible. This includes making an assessment of the odour at the complainant's property and visiting the factory to check whether they are complying with the requirements which we have placed upon them. Because our visits are often unannounced, there is no possibility of them bypassing the odour treatment systems apart from when inspected.					
	It is therefore best if you can call us whenever you regard the odour to be unacceptable so that we can investigate thoroughly. Please call 01392 265148 during office hours or 0845 351 10 60 during the evenings/at weekends.					
	If you have any further questions about this matter, please contact me on 01392 265474.					
Case Comments	Factory had major fault with No2 Boiler on Friday. This was fixed at 2200 on Friday night. Factory was processing normally all day Saturday prior to complaint - no problems and towers all OK.

25/06/2012	25/06/2012 10:10 Rivermead Road (2) Factory complaint - weather overcast and still					
<b>Case Actions:</b>						
Case Comments	Complaint received via Customer Services:					
	Rivermead Road resident called to complain that the smell from the above is horrendous this morning - customer doesn't really need a call but he would like it logged re the smell					
Case Comments	Factory not processing at time of call.					
	JLT tower running, all OK.					
WK/201202353						
26/06/2012	26/06/201215:44Rivermead Road (3)Factory complaint - humid but overcast					
Case Actions:						
Phone call receive	ed Call received regarding smell from JL Thomas. It was also apparently bad at the weekend. Complainant believes issue i					

app caused by 'leaving the trucks out'.

Details

EPSU Officer Visit	RS investigated - no detectable odour in the Rivermead Road area however there was a strong, clean tower odour around Belle Isle.			
	Called the factory, who have found nothing wrong on site.			
Phone call made	Call to the complainant about the odour. The complainant said that the odour had been very bad over the weekend however it has been bad today as well.			
	We discussed the issue and I explained that I had been out today and that the factory is currently operating within its set limits. There are no lorries parked outside as the complainant had suggested.			
	The complainant was happy with the odour at present as the wind has moved, but will call again if it returns.			
WK/201202359				
26/06/2012 20	5/06/2012 16:30 Feltrim Avenue (1) Factory Complaint - overcast and humid.			
Case Actions:				
EPSU Officer Visit	RS in the area at time of call, investigating an earlier complaint.			
	There was a strong clean tower smell in the Belle Isle area. Factory processing normally, towers all OK.			
WK/201202380				
27/06/2012 27	7/06/2012 13:14 Marsh Green Road North Factory complaint - humid and overcast. (1)			
Case Actions:				
Phone call received	Call regarding a smell although complainant couldn't confirm whether it was from the rendering plant or Devon Contract Waste. Smell is of rotting vegetables.			
Case Comments	Wind direction mainly SE although very slight. Occasional clean treated air smell in area of complainant. No odour along boundary of Devon Contract Waste.			
	Complaint therefore attributed to JLT although description of 'rotting vegetables' is unusual.			
	No process problems at factory, towers all good.			
WK/201202383				
27/06/2012 20	5/06/2012 22:16 Rivermead Road (1) Factory complaint - weather overcast and drizzling			
Case Actions:				
Case Comments	Complaint made direct to factory out of hours.			
	No process problems at time of call. Factory running well and towers all on set points.			
WK/201202416				
28/06/2012 28	<b>B/06/2012 08:30</b> Chandlers Walk (1) Factory complaint - weather humid, overcast and still			
Case Actions:				
Case Comments	Call at 0930 to say that smell is bad in the mornings, evenings and weekends. Complainant had noticed it on way to work at 0830.			
	AB investigated - but wind had freshened and moved SW by 0930 so no odour at complainant's property. Had noticed a slight but fairly widespread, stale, treated air smell on Southernhay at around 0800 however.			
	No faults on site, process running well and air inside factory exceptionally clear. SF smelt strongly chemical, but OK.			
WK/201202429				
	8/06/2012 15:00 St Bernards Close (1) Factory complaint - weather sunny and humid			
Case Actions:				
Casa Commonts	AB in area not long before call - slight small flakt tower smell. Not particularly fresh but not unacceptable. Factory running normally at time of call, but will shut down soon because of low stocks. Page 9

factory complaint, overcast light SW wind

**Case Actions:** 

Case	Received call from the public complaining about the smell in the Feltrim Avenue area, described as 'rotten boiling fles and bones. The normal smell in the area when they are operating'.
	RS asked if the complainant would like an update as to the findings of the investigation to which the complainant said no.
EPSU Officer Visit	RS visited the area, No noticeable odour in the Feltrim Avenue area, however the towers could be smelt in the Rivermead Road area. The odour was a relatively strong, chemical, slightly stale smell.
	On site the factory is running within set perimeters, sniffing points smell ok. However the JLT tower has a hint of something in the background which is not smelling as good as normal.
	NP will increase the chemical dosage on the tower slightly and keep a closer eye on the tower as the day goes on.
	The factory has about 120 tonnes of stock on site currently and will operate all day. The quality of the stock is normal.
	Boiler is firing at 100%
	Strong effluent smell on site. The tank was warm but not septic.
WK/201202969	Strong effluent smell on site. The tank was warm but not septic.

Complaint Date	Odour Date / Time Address Details
Case Comments	RS was in the area shortly before call. Findings were as follows.
	No noticeable odour in the Feltrim Ave area, however the towers were picked up in the Rivermead Road area. The odou was a relatively strong chemical slightly stale smell.
	On site the factory is running within set perameters, sniffing points smell ok however the JLT tower has a hint of something in the background which is not smelling as good as normal.
	NP will increase the chemical dosage on the tower slightly and keep a closer eye on the tower as the day goes on.
	The factory has about 120 tonnes of stock on site currently and will operate all day. The quality of the stock is normal.
	Boiler is firing at 100%
	Strong effluent smell on site, tank warm but not septic.
WK/201203316	
25/07/2012	25/07/2012 15:05 Marsh Green Road North Factory complaint - weather hot and sunny (1)
Case Actions:	
Case Comments	Call received when no officers available to attend because of meetings.
	NP reported that on his assessment of the area he did not detect any odour on Marsh Green Road, although there was a slight stale raw material odour in the walkway through to Marsh Barton. The wind was in the correct direction for the complainant.
	NP was informed by the team leader that there were a couple of vehicles which arrived at the same time and there was a delay in tipping them, therefore they were parked up longer than normal, just prior to the complaint. Vehicles all tipped by 15:15.
	AB called complainant to explain situation.
WK/201203332	
26/07/2012	26/07/2012 10:17 Marsh Green Road North Factory complaint - Weather is very hot and humid. (1)
Case Actions: EPSU Officer Vis	sit Call regarding an 'agricultural smell' coming from JL Thomas again.
	RS visit to the site.
	No noticeable odour of JLT at the rear of the premise at the time of the visit. However outside on the main road Hide and Skin was quite odourous. (RS advised them to close the main doors) The complainant stated that the smell was the same as yesterday - an agricultural type smell.
	Driving down Alphington Road RS passed a JLT lorry leaving the site which was extremely odourous. This smell was noticeable all the way back to the factory. This was pointed out to the site who confirmed that the lorry had delivered some fallen stock at around 10:30 which may have corresponded with the time of the complaint.
	On site the towers were all smelling clean and running within the set limits. The boiler was firing at 100% Some smell round the effluent tank which given the temp is expected. The material being processed currently is not of a very high quality but the site has no reported problems.
WK/201203364	
26/07/2012	26/07/201216:45Water Lane (2)Factory complaint - weather hot and sunny
Case Actions:	
Case Comments	Call to say that the odour was very bad on complainant's return to work.
	AB rang factory - no process problems and towers all operating well. One lorry had arrived shortly before call, which may have contributed.
	may have contributed.

Complaint Date Od	lour Date / Time Address Details
EPSU Officer Visit	RS investigating complaints about the odour from the factory from 14:30- 17:00
	A strong tower odour from the factory detected in the Rivermead Road, Salmonpool Lane area. Although distinctly a tower smell, it was not the cleanest tower smell.
	RS spent considerable time on site with the management of the factory discussing the problem. The factory is experiencing difficulties due to the quality of the material that they are receiving.
	The factory closed down on Sunday with 110 tonnes of material in stock and started up early on Monday in order to try and clear the material.
	The sniffer points on the towers all smelt clean and the atmosphere in the plant was clear. However the some of the material was of exceptionally poor quality and was causing considerable processing difficulties.
	The management were keeping a close eye on the towers and the processing of the material. The management were also undertaking odour assessments off site.
	The plan was to try and clear the backlog of poor material by the following day.
Phone call made	RS made call to the complainant.
	The complainant was very upset about the odour, and will contact the council if the odour returns.

I know nothing about Environmental Health restictions on such to have this kind of factory. Many thanks,

Page 22

things, but it just seems a far to built up an area to have this kind of factory. Many thanks,

Details

E-Mail sent Thank you for your email regarding the odour emitted from the PDM factory. Exeter City Council regulates the facility under the Environmental Permitting (England and Wales) Regulations.

The factory is subject to regular inspections by ECC officers as well as additional visits as part of the Council's procedure for investigating complaints. During these inspections and investigations ECC officers check the operational parameters of the factory and compliance with the conditions of the permit issued under the above legislation.

An ECC officer investigated the complaints from Wednesday by visiting the area and the factory. The factory was processing very poor quality raw material as a result of the warm weather the week before. This was more difficult for the factory to process as well as being inherently more odorous, which places additional load on the odour treatment systems. The quality of the raw material is a national problem not just a local issue and is something which ECC will raise with DEFRA as a serious concern. Despite the poor material quality, the operations on site were all within the operational limits set in the conditions of the permit.

ECC will continue to monitor the site to ensure that they comply with the conditions of their permit.

Kind regards

Case Actions:				
Phone call receiv	ed Call rece	ived rega	arding the JL Thomas plant a	and the smell which has been getting worse over the last few weeks and
			oticeable whilst putting her	

EPSU Officer Visit RS walked from Belle Isle to Salmonpool Lane via Knightly Road and Rivermead Road.

A slight residual tower smell which was very faint in Rivermead Road No odour in Salmonpool Lane or Knightly Road.

Because other complaints had been received, RS was joined by NP for further odour assessment in the area. (The area covered was Swan Court back to Rivermead Road because the wind had shifted westerly).

Nothing detected at all in the area although the wind continued to shift towards Countess Wear.

The factory was shut down and had approximately 30 tonnes of stock on site.

Only one tower running (JLT) which smelt clean, and was operating within the set limits.

On site it was noted that a loading shovel and a 360 swing shovel normally used inside the factory were parked up outside (one at the front of the factory and the other at the rear). These had not been washed down.

It is doubtful whether the odour from these would carry as far as the complainants, although the odour locally was quite strong. NP spoke to members of staff to get the loading shovels stored correctly inside the factory.

A strong odour was also noticed adjacent to the vents in the boiler room wall beside the canal. NP instructed a member of staff to wash the boiler room down.

On leaving the site RS observed that the loading shovel and the swing shovel had been put inside the factory.

Phone call made The complainant is very unhappy about the smell from the factory this morning. They described it as the "chemical smell". They have lived in the house for 14 years and consider it to be getting worse. They have never complained about the smell before but they have now had enough.

The complainant asked if the factory could be made to operate just at night. I explained that they operate day and night dependent on what material stocks that they have to process.

The complaint said that they had spoken to others in the area and understood that others had complained about the factory. The complainant said that they had been told that the factory only took care about what they were doing when ECC have been down to investigate.

I explained that as the operations at the factory were computer controlled and as part of this nearly everything was monitored and recorded. If a complaint is received, ECC can check what was going on at the time of the complaint so the factory are very careful with operational parameters.

The complainant will call again to complain now that they know who to call.

#### WK/201203636

#### 06/08/2012 06/08/2012 11:55 Old Mill Close (1)

Factory complaint, weather warm and overcast, occasional showers.

**Case Actions:** 

EPSU Officer Visit RS walked from Bell Isle to Salmonpool Lane via Knightly Road and Rivermead Road.

A slight residual tower smell which was very faint in Rivermead Road No odour in Salmonpool Lane or Knightly Road.

Because other complaints had been received, RS was joined by NP for further odour assessment in the area. (The area covered was Swan Court back to Rivermead Road because the wind had shifted westerly).

Nothing detected at all in the area although the wind continued to shift towards Countess Wear.

The factory was shut down and had approximately 30 tonnes of stock on site.

Only one tower running (JLT) which smelt clean, and was operating within the set limits.

On site it was noted that a loading shovel and a 360 swing shovel normally used inside the factory were parked up outside (one at the front of the factory and the other at the rear). These had not been washed down.

It is doubtful whether the odour from these would carry as far as the complainants, although the odour locally was quite strong. NP spoke to members of staff to get the loading shovels stored correctly inside the factory.

A strong odour was also noticed adjacent to the vents in the boiler room wall beside the canal. NP instructed a member of staff to wash the boiler room down.

On leaving the site RS observed that the loading shovel and the swing shovel had been put inside the factory.

13/08/2012	10/08/201214:12Water Lane (2)Factory complaint - weather warm and breezy							
Case Actions:								
E-Mail	email received:							
	'As of around 13:30 today the smell from the JP Thomas plant became unacceptable and has stayed that way for 40 minutes now.							
	Once again I find myself at home today with 25 degrees C outside and I have to close my windows. Surely this sort of thing cannot be allowed to continue. '							
EPSU Officer Visit	AB investigated - was strong but clean tower smell along Water Lane.							
	Factory processing well and all towers on set points and smelling good.							
E-Mail	email sent:							
	Thank you for your email on Friday. As a result I made an investigation in the Water Lane area and checked the systems in place at the factory.							
	I found that there was a locally strong odour in parts of Water Lane. This was from the chemical treatment towers which are used to destroy the odours from the rendering process. The residual odour from these towers is minimised by adjusting the chemical inputs to them, but cannot be avoided all together. It was stronger than usual on Friday and the factory are carrying out additional checks on the towers today to see if they can identify a cause for this.							
	Thanks again and please call me on 265474 if you wish to discuss this further.

	In orde making	Thank you for your email about the odour from JL Thomas. In order to make a full investigation of any complaints, we endeavour to investigate as soon as possible. This includes making an assessment of the odour at the complainant's property and visiting the factory to check whether they are complying with the requirements which we have placed upon them. It is therefore best if you can call us whenever you regard the odour to be unacceptable so that we can investigate thoroughly. Please call 01392 265148 during office hours or 0845 351 10 60 during the evenings/at weekends. If you have any further questions about this matter, please contact me on 01392 265474.

EPSU Officer Visit	AB in the area at the time of the complaint. Described the smell as a fairly clean tower odour.						
Phone call made	Factory running and will be running until Saturday. No reported problems on site. The factory will undertake an onsite investigation and report any problems to us if found.						
Phone call made	Call to the complainant, who said that the smell was not as bad today as it had been earlier in the week and has now gon from their property. I explained that an officer had been in the area at the time of the complaint and described it as a strong tower odour. The complainant agreed.						
	Described the odour as the same as normal, nothing too strong, but would like to report it.						
WK/201204024							
17/08/2012 17/	/08/2012 17:03 Water Lane (3) Vehicle complaint - weather muggy						
Case Actions:							
Case Comments	Call to complain generally about odour from vehicles which seems to have got worse recently.						
	I explained the situation regarding the regulation of odour from lorries and the actions that the factory take to control them. I asked the complainant to note any registration numbers so that we can investigate specific instances in future.						
WK/201204064							
20/08/2012 20/	/08/2012 15:40 Rivermead Road (1) Factory complaint - weather warm and sunny						
Case Actions:							
Case Comments	Complaint made direct to factory and no ECC officers available to respond.						
	Factory had been running for approx 1 hour at time of call. No process problems and towers all OK.						
WK/201204091							
21/08/2012 21/	/08/201212:49Feltrim Avenue (1)Factory Complaint - Overcast, gusty, quite humid						
Case Actions:							
Phone call received	Call received from complainant regarding the 'on/off' odour, dependent on the wind. Has been an issue all morning and was also noticeable down by the Quay.						
Case Comments	AB and RS in area at time of call - was occasional, but quite strong, treated air smell.						
	Factory processing normally, no problems with towers.

the PDM meat rendering plant. The repulsive smell lingers both day and even at night on a regular basis. Despite hot weather i can't open the windows in my flat because of the stench. It's very intrusive. I am also 7 months pregnant, so my sense of smell is heightened which makes what is already a putrid stench even worse. It stops me from eating and sleeping at times. I think it is extremely inappropriate that this facility even be anywhere near a busy residential and leisure area. It makes me not want to live here any more. Please help!

Case Comments	AB investigated - factory running well and towers all OK.						
	Occasionally strong treated air smell. Very turbulent and gusty wind so hard to find odour over a large area of quayside etc.						
	Smell only ever lasted a very short period in one place.						
E-Mail	email sent:						
	Hello,						
	I am sorry that the odour has disturbed you so much. When I received your complaint on Friday I went out to investigate There was a noticeable smell from the factory in the Water Lane/quay area although it started to pour with rain while I was out and the smell went then.						
	Unfortunately the nature of the odour abatement systems that they use means that some residual chemical-type odour remains. The factory try to keep this to a minimum but it can be noticeable downwind of the site.						
	If we receive a complaint we try to investigate straight away and check whether there are any problems at the factory. If they are doing something wrong, or there are problems that they need to fix then we will make them do this. It is easier to respond quickly if complaints are made by telephone at the time when the odour is a problem. Please call 01392 265474 (working day) or 0845 351 1060 (evenings and weekends).						
	We are currently talking to the factory about longer term changes in their abatement systems to improve the situation bu we do not yet know what the outcome of those discussion will be. If we identify that different technologies are available and would be effective then we can make them invest in these.						
	Please give me a call if you would like to discuss this matter further.
