Julie Masci

Engagement Lead (incoming)

T: 0292 034 7506

E: Julie.Masci@uk.gt.com

This paper provides the Audit and Governance Committee with a report on progress in delivering our responsibilities as your external auditors.

The paper also includes a summary of emerging national issues and developments that may be relevant to you as a local authority.

Members of the Audit and Governance Committee can find further useful material on our website, where we have a section dedicated to our work in the public sector. Here you can download copies of our publications www.grantthornton.co.uk.

If you would like further information on any items in this briefing, or would like to register with Grant Thornton to receive regular email updates on issues that are of interest to you, please contact your Engagement Lead.

Progress at March 2021

Financial Statements Audit

We have begun our audit planning for the 2020/21 financial year. There have been changes to your audit team, with Julie Masci taking over as Engagement Lead for the 2020/21 audit due to wider portfolio changes for our Engagement Leads. Your previous Engagement Manager Steve Johnson has retired, and Katie Whybray will take over this role for 2020/21.

Our planning process will continue over the coming months and we have begun to liaise with your finance team on this work. Changes to audit and reporting timetables due to Covid-19 in 2019/20 mean that we are starting planning later than we normally would in the audit cycle, and we will share our Audit Plan with members for information in advance of the next planned Audit and Governance Committee in June 2021.

There is currently a consultation underway on the reporting timetable for the 2020/21 financial statements and audit process.

Value for Money

On 1 April 2020, the National Audit Office introduced a new Code of Audit Practice which comes into effect from audit year 2020/21. The Code introduced a revised approach to the audit of Value for Money (VFM).

There are three main changes arising from the NAO's new approach:

- A new set of key criteria, covering financial sustainability, governance and improvements in economy, efficiency and effectiveness
- More extensive reporting, with a requirement on the auditor to produce a commentary on arrangements across all of the key criteria, rather than the current 'reporting by exception' approach
- The replacement of the binary (qualified / unqualified) approach to VFM conclusions, with far more sophisticated judgements on performance, as well as key recommendations on any significant weaknesses in arrangements identified during the audit.

Further detail on the NAO's revised approach to VFM work can be found here: <https://www.nao.org.uk/code-audit-practice/wp-content/uploads/sites/29/2019/12/AGN-03-Auditors-Work-on-Value-for-Money-Arrangements.pdf>

The new Code of Audit Practice issued by the NAO can be found here: https://www.nao.org.uk/code-audit-practice/wp-content/uploads/sites/29/2020/01/Code_of_audit_practice_2020.pdf

The changes will lead to increased work and reporting requirements and we will report our Value for Money commentary in our Auditor's Annual Report, which replaces the Annual Audit Letter.

Other areas

Certification of claims and returns

We certified the Council's annual Housing Benefit Subsidy claim in accordance with procedures agreed with the Department for Work and Pensions (DWP) on 12 February 2021. We identified no new errors in our 2019/20 testing, however testing in respect of the earned income calculation errors identified in prior years identified errors again in 2019/20. We identified underpayments of Housing Benefit totalling £143 as a result of these errors and reported an extrapolated error of £2,733 due to overpaid benefit as a result of earned income calculation errors. The Council's total subsidy claim was £ for 2019/20.

We also certify the Council's annual Pooling of Housing Capital Receipts return in accordance with procedures agreed with the Ministry of Housing, Communities & Local Government (MHCLG) in accordance with the national timetable. No issues were noted from this work.

Sector Update

Councils continue to try to achieve greater efficiency in the delivery of public services, whilst facing the challenges to address rising demand, ongoing budget pressures and social inequality.

Our sector update provides you with an up to date summary of emerging national issues and developments to support you. We cover areas which may have an impact on your organisation, the wider local government sector and the public sector as a whole. Links are provided to the detailed report/briefing to allow you to delve further and find out more.

Our public sector team at Grant Thornton also undertake research on service and technical issues. We will bring you the latest research publications in this update. We also include areas of potential interest to start conversations within the organisation and with audit committee members, as well as any accounting and regulatory updates.

Revised auditing standard: Auditing Accounting Estimates and Related Disclosures

In the period December 2018 to January 2020 the Financial Reporting Council issued a number of updated International Auditing Standards (ISAs (UK)) which are effective for audits of financial statements for periods beginning on or after 15 December 2019. ISA (UK) 540 (revised): *Auditing Accounting Estimates and Related Disclosures* includes significant enhancements in respect of the audit risk assessment process for accounting estimates.

Introduction

Under ISA (UK) 540 (Revised December 2018) auditors are required to understand and assess an entity's internal controls over accounting estimates, including:

- The nature and extent of oversight and governance over management's financial reporting process relevant to accounting estimates;
- How management identifies the need for and applies specialised skills or knowledge related to accounting estimates;
- How the entity's risk management process identifies and addresses risks relating to accounting estimates;
- The entity's information system as it relates to accounting estimates;
- The entity's control activities in relation to accounting estimates; and
- How management reviews the outcomes of previous accounting estimates.

As part of this process auditors also need to obtain an understanding of the role of those charged with governance, which is particularly important where the estimates have high estimation uncertainty, or require significant judgement.

Specifically do Audit and Risk Committee members:

- Understand the characteristics of the methods and models used to make the accounting estimates and the risks related to them;
- Oversee management's process for making accounting estimates, including the use of models, and the monitoring activities undertaken by management; and
- Evaluate how management made the accounting estimates?

Additional information that will be required for our March 2021 audits

To ensure our compliance with this revised auditing standard, we will be requesting further information from management and those charged with governance during our audit for the year ended 31 March 2021 in all areas summarised above for all material accounting estimates that are included in the financial statements.

Based on our knowledge of the Council we have identified the following material accounting estimate for which this is likely to apply:

- Valuation of land and buildings, including investment property
- Valuation of the net defined benefit liability
- Expenditure accruals
- Provisions
- Depreciation
- Loss allowances

The Council's Information systems

In respect of the Council's information systems we are required to consider how management identifies the methods, assumptions and source data used for each material accounting estimate and the need for any changes to these. This includes how management selects, or designs, the methods, assumptions and data to be used and applies the methods used in the valuations.

When the models used include increased complexity or subjectivity, as is the case for many valuation models, auditors need to understand and assess the controls in place over the models and the data included therein. Where adequate controls are not in place we may need to report this as a significant control deficiency and this could affect the amount of detailed substantive testing required during the audit.

If management has changed the method for making an accounting estimate we will need to fully understand management's rationale for this change. Any unexpected changes are likely to raise the audit risk profile of this accounting estimate and may result in the need for additional audit procedures.

Estimation uncertainty

Under ISA (UK) 540 (Revised December 2018) we are required to consider the following:

- How management understands the degree of estimation uncertainty related to each accounting estimate; and
- How management address this estimation uncertainty when selecting their point estimate.

For example, how management identified and considered alternative, methods, assumptions or source data that would be equally valid under the financial reporting framework, and why these alternatives were rejected in favour of the point estimate used.

The revised standard includes increased emphasis on the importance of the financial statement disclosures. Under ISA (UK) 540 (Revised December 2018), auditors are required to assess whether both the accounting estimates themselves and the related disclosures are reasonable.

Where there is a material uncertainty, that is where there is a significant risk of a material change to the estimated carrying value of an asset or liability within the next year, there needs to be additional disclosures. Note that not all material estimates will have a material uncertainty and it is also possible that an estimate that is not material could have a risk of material uncertainty.

- Where there is material estimation uncertainty, we would expect the financial statement disclosures to disclose:
- What the assumptions and uncertainties are;
- How sensitive the assets and liabilities are to those assumptions, and why;

- The expected resolution of the uncertainty and the range of reasonably possible outcomes for the next financial year; and
- An explanation of any changes made to past assumptions if the uncertainty is unresolved.

How can you help

As part of our planning risk assessment procedures we routinely make a number of enquiries of management and those charged with governance, which include general enquiries, fraud risk assessment questions, going concern considerations etc. Responses to these enquires are completed by management and confirmed by those charged with governance at an Audit and Risk Committee meeting. For our 2020/21 audit we will be making additional enquires on your accounting estimates in a similar way (which will cover the areas highlighted above). We would appreciate a prompt response to these enquires in due course.

Further information

Further details on the requirements of ISA (UK) 540 (Revised December 2018) can be found in the auditing standard on the Financial Reporting Council's website:
