

## Equality Impact Assessment: Revised Local Development Scheme 2024

The Equality Act 2010 includes a general duty which requires public authorities, in the exercise of their functions, to have due regard to the need to:

- **Eliminate discrimination**, harassment and victimisation and any other conduct that is prohibited by or under the Act.
- **Advance equality of opportunity** between people who share a relevant protected characteristic and people who do not share it.
- **Foster good relations** between people who share a relevant protected characteristic and those who do not.

In order to comply with the general duty authorities must assess the impact on equality of decisions, policies and practices. These duties do not prevent the authority from reducing services where necessary, but they offer a way of developing proposals that consider the impacts on all members of the community.

Authorities which fail to carry out equality impact assessments risk making poor and unfair decisions which may discriminate against particular groups and worsen inequality.

**Factors to consider in the assessment:** For each of the groups below, an assessment has been made on whether the proposed decision will have a **positive, negative or neutral impact**. This is must be noted in the table below alongside brief details of why this conclusion has been reached and notes of any mitigation proposed. Where the impact is negative, a **high, medium or low assessment** is given. The assessment rates the impact of the policy based on the current situation (i.e. disregarding any actions planned to be carried out in future).

**High impact** – a significant potential impact, risk of exposure, history of complaints, no mitigating measures in place etc.

**Medium impact** –some potential impact exists, some mitigating measures are in place, poor evidence

**Low impact** – almost no relevancy to the process, e.g. an area that is very much legislation led and where the Council has very little discretion
