You must keep the rest of your V5C – you will need this to register your vehicle abroad.

If you're selling the vehicle to a new keeper with a foreign address go to: gov.uk/taking-vehicles-out-of-uk.

Date of export:

Which country are you exporting the vehicle to?

6 New keeper slip – must be given to the new keeper

Do not send this slip to DVLA on its own – you will not get a V5C.

You, the new keeper, must ensure the vehicle is taxed before you drive it.

You will be fined if our records show that the vehicle is not taxed, insured or no Statutory Off Road Notification (SORN) has been made.

It's quick and simple to tax online at: gov.uk/vehicle-tax

Declare the vehicle off road online at: gov.uk/make-a-sorn

You should receive your new V5C within 4 weeks of the registered keeper giving us your details.

If you do not receive your V5C, you'll need to fill in a V52 form to apply for a new one. Send it, with this slip, to DVLA, Swansea, SA99 1DD. Make sure the date of sale or transfer box is filled in.

Servicing:

- The service history seen, indicated that the last recorded service was carried out at miles. No immediate servicing is necessary. Next service is due as per manufacturer's recommendations or as per the Vehicles Service indicator.
- The service history seen, indicated that the last recorded service was carried out on miles. Therefore the engineer would suggest a full service and brake inspection to the manufacturer recommendations prior to purchase, which may reveal further defects not apparent at this examination.
- No service documentation seen with this vehicle and therefore the engineer would recommend a full service and brake inspection to the manufacturer's recommendations prior to purchase, which may reveal further defects not apparent at this examination.

Inspection conditions notes:

- No vehicle hoist/ramp was available. A large trolley jack and stands were used in order to carry out underside checks. This limits the view of the underside. Some areas could not be fully seen. There *may* be further defects, which may be visible given clear access and view.
- The body/paintwork was wet/dirty/dusty this severely restricts inspection of the paintwork. Please note that there may be other defects present, which were not visible due to the obscured paintwork, but which may become visible once dry and clean.

Engineers Comments

The vehicle is considered overall to be a fair and reasonable example of the type, being in a generally reasonable condition and generally considered to be consistent with the type for the age and indicated recorded mileage in most areas.

The items listed as "could not be checked" (---) normally indicate items were obscured by covers/shields or other equipment.

The Water pump – Engine drive belt/chain - these items could not be fully examined, as covers, trims and other equipment obscure them.

The cooling system was pressure tested to 0.7 bars, no pressure loss was noted on the system or pressure cap. The antifreeze concentration was acceptable, but has deteriorated from its original strength and at the next routine service may need to be refreshed/replaced. It is advised that the coolant strength be checked again at the next routine service. Antifreeze only has a 2/3-year life and requires its strength adjusting after this time or replacing as per manufacturer's specifications.

The vehicle is fitted with vented front brake disc and pads, supported at the rear by a single arrangement. Although the visible brakes only show some signs of general serviceable wear, some deterioration is noted, which will need attention in the near future. It is strongly advised to remove all road wheels and examine the inner brake components, which are obscured on this vehicle prior to purchase, replacing any worn or badly corroded parts. It is probable that the front brakes at least, will need to be replaced at the next routine service.

The steering & suspension has been assessed to MOT standard. This allows for a degree of wear and deterioration of components without rendering them unserviceable. The extent of wear is not considered excessive at this juncture and unlikely to attract MOT failure.

The road test distance and/or top speed was limited due to the general area/inspection location, and/or traffic levels and/or adverse weather conditions and/or lack of fuel when the vehicle was tested and driven. Comment cannot be made in these instances in relation to possible "high speed" or "sustained speed," related driving defects, which may become apparent at a later stage after any purchase due to these limiting conditions.

Essential Repairs

It is strongly advised that the essential defects are investigated and rectified prior to purchase.
