### **OBSERVATIONS**

This is an application under Regulation 3 of the Town and Country Planning General Regulations 1992, Statutory Instrument 1492 (SI 1492), for development by the local authority (Exeter City Council) for the redevelopment of an existing dwelling, through the proposed demolition of that dwelling and erection of a replacement dwelling. The current application is one of a series of applications to demolish and rebuild many of the Council's dwelling houses and has been made as the property has been deemed structurally unsound. The proposal would slightly increase the footprint of the new building as compared to the existing through the inclusion of a two-storey rear extension. The proposal would also alter the internal arrangements to site the bathroom upstairs and create a downstairs toilet adjacent to the porch. The proposed dwelling would feature a larger kitchen/diner area than the existing and overall the new dwelling would have better insulation and be more energy efficient.

There would be no significant impacts on the street scene or upon visual amenity as the replacement dwelling would largely replicate the existing house. In terms of residential amenity whilst the proposed dwelling would slightly project beyond the existing rear building line it would not significantly impact on amenity. In terms of access and parking arrangements these would remain as per the existing dwelling.

The proposed development is exempt from the CIL charging scheme as it relates to development for the provision of social housing and the applicant has submitted the relevant completed CIL liability and CIL exemption forms.
